Architectural
Mirror
Finish

Uniform,
flat surface

Versatile and
easily formable

Lightweight
yet rigid

Easy to install

Highly resistant
to weather

Up to 20 years
warranty

 **MADE IN BRITAIN**

New opportunities in architectural design

Alupanel XT Mirror offers a highly reflective mirror finish with excellent exterior durability combined with the benefits of robust quality, superb flatness and excellent processing characteristics.

Faced with a 0.5mm aluminium skin that has been mirror polished, sealed and then clear-coated, these panels make for extremely eye-catching ceiling and facade projects.

The versatility of the pre-coated substrate allows usage in a wide bandwidth of aluminium cladding solutions up to 1250 mm and its ultra-reflecting effect provides numerous new creative possibilities in architectural design. Alupanel XT Mirror is ideal for a diverse range of internal and external applications including interior design, shop-fitting, sign making and cladding.

Applications:

- Interior wall & ceiling decoration
- Corporate ID
- Curtain walling
- Shop/external fascias
- Rainscreen wall cladding
- Outdoor advertising
- Tunnel lining

 **MADE IN BRITAIN**

Property

Panel Thickness (mm)	4
Skin Thickness (mm)	0.5
Weight (kg/m²)	5.5
Skin	Aluminium
Core composition	LDPE

Sheet Sizes

Width	Length
1250	2500/3050
